

If you have an idea for an article, please contact me at [stephen.dupont@pockethercules.com](mailto:stephen.dupont@pockethercules.com) or message me through LinkedIn.

Here are the cover themes for the next several issues:

April 2023: Careers in Futures

June 2023: Speculative Fiction -- The Time Machine (futurists write short pieces of fiction)

Sept. 2023: Water and Futures

Nov. 2023: AI/Robotics

Feb. 2024: Collapse Issue

April 2024: Food and Futures

We generally have 4-5 articles around a theme and include articles about other topics that I think would be of interest to professional futurists. Here's a link to our most recent issue to give you a sense of the types of articles we're looking for: <https://www.apf.org/compass>

I'm also looking for more articles about the following:

- Technology, such as software, that supports futurists in their work
- How-to articles -- how to do scenario planning better, etc.)
- Theory articles -- articles about new foresight and futures studies theories; commentary on well-known or forgotten theories
- Case studies -- articles about successful foresight projects
- Systems thinking

But really, no idea is off limits. It's more important that you're passionate about the topic you're writing about.

And if you have a new book -- please send me a hard copy or an e-book and I will find a writer to review it.

Here are general guidelines for submitting an article:

- Seeking articles that are 1,000 to 1,500 words in length
- Submit in Word document
- Write in magazine style, not academic journal style
- Include a recent headshot photo of yourself in jpeg format
- Include a brief bio
- Include a link to a website, LinkedIn page or your email for readers to reach you

Thank you in advance for considering this request and helping our team make Compass a publication that adds value to your membership in the APF. I appreciate your support.
